PROJECTS

VOT3 (Live Link) ⬏ | React.js, Ethers.js, Hardhat, JavaScript, Solidity   **GitHub ⬏**

- Created a Decentralized Voting System on the Goerli Testnet, enhancing transparency and security by recording votes on a public ledger.
- Decentralized voting systems are more cost-effective than traditional voting systems, as they require fewer resources and personnel to operate.

Codeforces Dashboard (Live Link) ⬏ | Next.js, Tailwind CSS, Codeforces API   **GitHub ⬏**

- Engineered a responsive web application to visualize Codeforces user data and problem-solving statistics.
- Executed real-time data fetching from the Codeforces API, ensuring up-to-date user information and used charts to represent statistics visually.
- Formulated a problem recommendation system to suggest problems to users based on their rating, helping them to improve their skills effectively.
